The tests were carried out in October 2019 by the Materialprüfanstalt für das Bauwesen (Institute of Materials Testing for Civil Engineering) in Braunschweig. For Dr. Gabriele Gärtner, head of Technical Service for mineral insulating materials at Evonik, the result confirms her in her convictions: "If you expect top performance in insulation and fire safety, you'd be well advised to choose CALOSTAT®. Like CALOSTAT® Pure, our new variants fulfill our promise to our customers: slim, safe, and sustainable."

Company information

Evonik is one of the world leaders in specialty chemicals. The focus on more specialty businesses, customer-oriented innovative prowess and a trustful and performance-oriented corporate culture form the heart of Evonik's corporate strategy. They are the lever for profitable growth and a sustained increase in the value of the company. Evonik benefits specifically from its customer proximity and leading market positions. Evonik is active in over 100 countries around the world. In fiscal 2018, the enterprise with more than 32,000 employees generated sales of €13.3 billion and an operating profit (adjusted EBITDA) of €2.15 billion from continuing operations.

About Resource Efficiency

The Resource Efficiency segment is led by Evonik Resource Efficiency GmbH and produces high performance materials and specialty additives for environmentally friendly as well as energy-efficient systems to the automotive, paints & coatings, adhesives, construction, and many other industries. This segment employed about 10,000 employees, and generated sales of around €5.5 billion in 2018 from continuing operations.
